BADGEHUB

ONE PRINTER. TWO WAYS TO PRINT.

CONNECT+ LOCAL OR CLOUD, YOUR CHOICE

This best-in-class desktop card printer features record print speeds up to 280 cards per hour, allowing for maximum output. Even better, there's no need to sacrifice quality as the printer provides 300 dpi high-resolution printing, resulting in outstanding badge production quality. The real distinction to this new device however is the flexibility and freedom it provides to users which is its ability to toggle between local and cloud mode. Run it as a traditional Windows print driver device, or as a cloud-connected IoT printer that issues badges directly from BadgeHub. One printer, two deployment paths. Zero compromise.

SET UP WITHOUT A LAPTOP

A standard built-in LCD screen makes setup effortless — including configuring the IP address directly at the printer, with visual and audible alerts and QR codes for help along the way.

LOCAL ⬤ CLOUD

Same trusted Connect performance, plus the flexibility to run it your way.
